

## **HHWP Community Needs Assessment**

### **HHWP Community Action**

The Hancock, Hardin, Wyandot, and Putnam Counties Community Action (HHWP) hired RLS & Associates, Inc. to conduct a comprehensive Community Needs Assessment for the four-county area. The assessment will focus on the needs of the Low-Moderate Income (LMI) populations in the four-county area. The assessment will include a demographic analysis, surveys to both the LMI population and social service agencies, research on current trends in economic and political factors affecting the LMI population, an analysis of existing studies done by other community organizations, and ultimately, identifying gaps in services provided to the LMI population. RLS will provide current detailed demographic information and analysis, develop a survey instrument that will be used to gather information from the LMI population and social service agency participants, and to create a database for the survey responses.
